As a member of our health plan you may have access to Aetna’s Quality Orthopedic Facilities

Aetna Institutes of Quality™ Orthopedic Care Facilities
Program Requirements for Designations

A facility that meets Aetna’s designation requirements for clinical quality, value and access for orthopedic care may be selected for the Institutes of Quality (IOQ) Orthopedic Care Facilities network. The procedure evaluation is limited to knee replacement, hip replacement, and spine surgery. Facilities must meet all requirements for knee and hip replacement to be designated for either, while spine surgery designation may be a stand-alone designation. A facility may also be designated for all three disciplines if all program requirements are met. Aetna evaluates the answers provided by the facility in its response to our survey of information, and reviews other publicly available data, as well as Aetna internal data.

Knee Replacement and Hip Replacement

I. Mandatory program requirements

In order for a facility to be eligible for consideration, it must meet all program requirements listed below. If the facility does not meet these requirements, it will not be considered for designation.

Volume:

Facility
Aetna Institutes of Quality Orthopedic Care Facilities must perform at least 200 knee replacement surgeries (primary and revisions) and 100 hip replacement surgeries in the most recent 12 calendar months.

Physician
Aetna Institutes of Quality Orthopedic Care Facilities must have one physician (in each of the categories) that performed at least 50 knee replacement surgeries (primary and revisions) and 50 hip replacement surgeries (primary and revisions) in the most recent 12 calendar months.

Facility and physicians delivering orthopedic care:

1. Facility must be accredited by one of the following:
   a. The Joint Commission (JJC)
   b. Healthcare Facilities Accreditation Program (HFAP)
   c. American Osteopathic Association
   d. National Integrated Accreditation for Healthcare Organizations (NIAHO)
   e. Det Norske Veritas (DNV) Healthcare

2. Facility must have available emergency services to include the following:
   a. Rapid response team
   b. Intensive care unit (ICU)

3. Facility’s total joint replacement program must have been established for at least one year.
4. Facility must be credentialed by Aetna, participate in the Aetna provider network for all products offered in the market, and be accredited by appropriate external entities.
5. Anesthesiologists, pathologists, and radiologists treating patients for orthopedic services are required to participate in Aetna’s provider network for all products offered in the market where feasible. Aetna network management may deviate from this requirement where business needs and/or inadequate access exist.

6. Facility must provide on-site availability (seven days a week) of specialist physicians (e.g., orthopedic, neurology, cardiology, pain management, infectious disease, and internists) participating in the Aetna network for all products offered in the market.

7. At least eighty percent (80%) of orthopedic surgeons providing these services at the facility must be board certified.

8. Facility must make available the following clinical services for consultation and daily primary care: anesthesiology, cardiology, pulmonology, radiology, infectious disease, psychiatry, psychology/behavioral health, physical therapy/occupational therapy, intensive care unit, specialized equipment, nutrition counseling/education, pharmacist.

**Quality and clinical outcomes and reporting:**

1. Within the most recent 12 calendar months of data available, the facility’s mortality and complication rates for selected conditions and procedures must be less than or equal to the minimums established, based on evidence available in the literature.

2. Facility must have a quality improvement program, with initiatives focused on continuously measuring and improving orthopedic care to include an automated data collection system and/or personnel in place.

3. Facility must perform patient satisfaction surveys and responsive improvement activities.

4. Facility must report orthopedic case information to external registries for orthopedic procedures established by National Surgical Quality Improvement Program (NSQIP), Premier Clinical Advisor, or equivalent state or regional reporting and quality improvement registry.

**II. Evaluation criteria in addition to required elements**

If a facility meets all requirements under Section I — Mandatory program requirements, Aetna evaluates and scores the facility’s remaining responses on the Request for Information (RFI) survey submission according to the criteria set forth below.

### Patient safety

Scores level of progress on patient safety measures, Computerized Physician Order Entry (CPOE), Safe Practices Score (SPS), and appropriate ICU staffing.

Participates in Centers for Medicare and Medicaid Service (CMS)/Premier Hospital Quality Incentive Demonstration (HQID) Project.

EMR certified by the Certification Commission for Healthcare Information Technology.

Planned implementation of the *Goals and Elements of Performance* of The Joint Commission 2010 National Patient Safety Goals.

Use of a surgical verification checklist.

Facility has the AAOS clinical guidelines on Symptomatic Pulmonary Embolism.

### Quality improvement programs

Participation in Institutes for Healthcare Improvement (IHI), Centers for Medicare & Medicaid Services (CMS)/Premier Hospital Quality Incentive Demonstration (HQID) Project, Surgical Care Improvement Project (SCIP).

- [www.ihi.org/IHI/Programs/Campaign](http://www.ihi.org/IHI/Programs/Campaign)
- [www.qualitydemo.com](http://www.qualitydemo.com)

### External Reporting

Facility must report to The Leapfrog Group, or an equivalent patient safety and quality initiative.

**Spine Surgery**

I. Requirements for consideration

**Volume:**

**Facility**
Aetna Institutes of Quality Orthopedic Care Facilities must perform at least 200 spine surgeries in the most recent 12 calendar months.

**Physician**
Aetna Institutes of Quality Orthopedic Care Facilities must have one physician that performs at least 50 spine surgeries in the most recent 12 calendar months.

**Facility and physicians delivering orthopedic care:**
1. Facility must be accredited by one of the following:
   a. The Joint Commission (JJC)
   b. Healthcare Facilities Accreditation Program (HFAP)
   c. American Osteopathic Association
   d. National Integrated Accreditation for Healthcare Organizations (NIAHO)
   e. Det Norske Veritas (DNV) Healthcare
2. Facility must have available emergency services to include the following:
   a. Rapid response team
   b. Intensive care unit (ICU)
3. Facility’s spine surgery program must have been established for at least one year.
4. Facility must be credentialed by Aetna, participate in the Aetna provider network for all products offered in the market, and be accredited by appropriate external entities.
5. An acceptable percentage, as determined by Aetna’s local market, of the Facility’s spine surgeries must be performed by orthopedic surgeons or neurosurgeons credentialed by Aetna and participating in Aetna’s provider network for all products offered in the market.
6. Anesthesiologists, pathologists, and radiologists treating patients for spine surgery are required to participate in Aetna’s provider network for all products offered in the market where feasible. In the event market conditions exist that preclude such a requirement Aetna personnel will adjust as necessary.
7. Orthopedic surgeons, neurosurgeons, anesthesiologists, and radiologists providing spine surgery services must be credentialed by Aetna and participate in the Aetna provider network for all products offered in the market.
8. Facility must provide on-site availability (seven days a week) of specialist physicians (e.g., orthopedic, neurology, cardiology, pain management, infectious disease, and internists) participating in the Aetna network for all products offered in the market.
9. At least eighty percent (80%) of orthopedic surgeons or neurosurgeons providing these services at the facility must be board certified.
10. Facility must make available the following clinical services for consultation and daily primary care: anesthesiology, cardiology, pulmonology, radiology, infectious disease, psychiatry, psychology/behavioral health, physical therapy/occupational therapy, intensive care unit, specialized equipment, nutrition counseling/education, pharmacist.

**Quality and clinical outcomes and reporting:**

1. Within the most recent 12 calendar months of data available, the facility’s mortality and complication rates for selected conditions and procedures must be less than or equal to the minimums established, based on evidence available in the literature.
2. Facility must have a quality improvement program with initiatives focused on continuously measuring and improving orthopedic care to include an automated data collection system and/or personnel in place.
3. Facility must perform patient satisfaction surveys and responsive improvement activities.
4. Facility must report orthopedic case information to external registries for orthopedic procedures established by National Surgical Quality Improvement Program (NSQIP), Premier Clinical Advisor, or equivalent state or regional reporting and quality improvement registry.

**II. Evaluation criteria in addition to required elements**

If a facility meets all requirements under Section I -- Mandatory program requirements, Aetna evaluates and scores the facility’s remaining responses on the Request for Information (RFI) survey submission according to the criteria set forth below.
