You know what they say about an ounce of prevention. So make a plan for good health this year and schedule your annual wellness visit, even if it isn’t until a few months from now. Talk to your doctor about which screenings and tests you need, such as mammograms, colorectal cancer screenings and immunizations, including flu shots. And keep in mind that preventive care is covered at no cost to you.

Tip: Log in to your member website and choose “Health Programs.” Then click on “Preventive Health Schedule” to see up-to-date preventive care recommendations.*

Flu season

Not all places offering flu shots are covered by your plan. But you can get yours at your primary care doctor’s office. Or you can go to a network walk-in clinic.

For more information about flu prevention, visit the Centers for Disease Control and Prevention website at cdc.gov/flu.

You never know when you may need medical care. So it's always good to understand your options. Getting the right care in the right place can save you money, too.

**Help when and where you need it**

Whenever your health or life is in serious danger, call 911 or go to the nearest emergency room. But go elsewhere — like an urgent care center or walk-in clinic — for non-life-threatening events.

Ask about generics
Taking generic drugs can help reduce what you pay for your prescriptions. They’re safe, effective and often cost less than their brand-name versions. And when you pay less for the medicine you need, it’s easier to follow doctor’s orders.
