

Massachusetts: Important precertification information for Fully-Insured Plans

We want to share details on precertification for certain behavioral health and substance use disorder benefits. Your Plan Documents (booklet/certificate and schedule of benefits) have full descriptions of the coverage provided for these services.

- (1) Precertification: Sometimes we'll pay for care only if we have given an approval before you get it. We call that precertification or preauthorization. Your PCP or Aetna network doctor will get this approval for you for covered in-network services. If the request is to go outside the network, you may have to get this approval yourself. To do so, call the precertification number on your Aetna ID card, or call Member Services. You must get the precertification before you receive the care. Our precertification, notice, and concurrent review policies and procedures can be found on our website: [Precertification](#) and [Utilization Management](#)
- (2) Aetna does not require precertification/authorization for routine behavioral health therapy or routine behavioral health outpatient medical visits (e.g., psychopharmacology visits).
- (3) Please check Aetna's precertification list or call Member Services to find the behavioral health outpatient services that require authorizations. [Behavioral Health Precertification List](#)
- (4) Please know that acute treatment services* (ATS) and clinical stabilization services** (CSS) treatment for substance use disorders (SUD) will be covered for up to a total of 14 days without authorization or medical necessity review.
- (5) Aetna does not require precertification for SUD treatment other than ATS and CSS (e.g. IOP, PHP) if the provider is certified or licensed by the Massachusetts Department of Public Health.

This applies to both in and out of network covered services. However, in network providers coordinate precertification/authorization on your behalf.

*Acute treatment services - Includes 24-hour medically supervised addiction treatment for adults or adolescents provided in a medically managed or medically monitored inpatient facility, as defined by the Department of Public Health (DPH), that provides evaluation and withdrawal management. Services may include biopsychosocial assessment, individual and group counseling, psycho-educational groups and discharge planning.

**Clinical stabilization services - Includes 24-hour clinically managed post detoxification treatment for adults or adolescents, as defined by the DPH. This usually follows acute treatment services for substance abuse, which may include:

- Intensive education and counseling regarding the nature of addiction and its consequences;

- Relapse prevention
- Outreach to families and significant others and
- Aftercare planning for individuals beginning to engage in recovery.

For details on any benefit maximums and the cost sharing under your plan:

- Refer to your plan documents
- Visit the Aetna website aetna.com
- Call the Member Services number on the back of your ID card
