

Most frequently prescribed medications

Aetna Specialty Pharmacy®

A specialty pharmacy is a provider of specialty medications to treat certain complex diseases, like multiple sclerosis, hemophilia and immune system disorders. Specialty medications can be injected, infused or taken by mouth. These medications may need to be refrigerated. They are often expensive and may not be available at retail pharmacies. Some may have side effects, so a pharmacist or nurse should monitor their use.

Aetna Specialty Pharmacy offers high-touch, therapy-specific support services to its members during their treatment with specialty medications.
