

4 to-do's before you choose

Cross these off, then pick your health plan

- 1 Find your doctor in our network using the [provider search tool](#)**

Nationwide, around two-thirds of doctors — and three-quarters of acute care hospitals — are in our network. So chances are that your doctor's in there, too.
- 2 Estimate your total expected yearly health care costs**

Using our [cost comparison tool](#), you can estimate total out-of-pocket costs for plans you're considering. This includes your monthly premium, copays for office visits or medicines, and your annual deductible.
- 3 Get to know what each plan covers**

Review your benefits enrollment site to see which Aetna® plan best meets your needs. From checkups to managing chronic conditions to emergency services, you'll find health care for the whole you.
- 4 Review the extras designed to keep you healthy**

Spend a few minutes exploring each Aetna plan. You can see how their extras can add up to better care and more choices. Lower costs, too.

Aetna is the brand name used for products and services provided by one or more of the Aetna group of subsidiary companies, including Aetna Life Insurance Company and its affiliates (Aetna).
