

Quality when it counts most – Institutes of Excellence™ Transplant Hospitals

Sometimes the best life-saving option may be an organ or bone marrow/stem cell transplant. These operations require a special degree of skill and care, so it's important to look for hospitals known for quality of care. We've simplified the process.

As a member, you have a special network of hospitals that specialize in these services. We call these hospitals our Institutes of Excellence™ (IOE) Transplant Hospitals. They participate in the network but only for the type of transplant listed in this section.

Your plan provides outstanding support

To support your transplant care, your plan provides nurses and coordinators to assist you under a program called the National Medical Excellence Program® (NME). This staff will work with you and your providers throughout your transplant care.

If your plan has more than one level of preferred benefits, it's especially important that you coordinate your care through our NME nurses and coordinators.

Your plan requires preauthorization

To be considered in network for coverage for transplant-related services, you must utilize an IOE Transplant Hospital that has been specifically contracted by Aetna for your transplant type. Services include evaluation, transplant, and follow-up care. Services must be preauthorized with Aetna for coverage to be effective. Any hospital that is not specified as an IOE Transplant Hospital is considered nonparticipating or nonpreferred for transplant-related services. This is the case even if they are considered participating for other types of services.

IOE Transplant Hospitals – program criteria

IOE Transplant Hospitals must meet our rigorous program requirements. To learn more about the IOE and view our IOE Transplant Hospitals program criteria, go to [Aetna.com/health-care-professionals/patient-care-programs/aetna-institutes.html](https://www.aetna.com/health-care-professionals/patient-care-programs/aetna-institutes.html) and click on "Program criteria for transplant support".
