Applies to:

Aetna plans

Innovation Health® plans

Health benefits and health insurance plans offered and/or underwritten by the following:

Allina Health and Aetna Health Insurance Company (Allina Health | Aetna)

Banner Health and Aetna Health Insurance Company and/or Banner Health and Aetna Health Plan Inc.

(Banner|Aetna)

Sutter Health and Aetna Administrative Services LLC (Sutter Health | Aetna)

Texas Health + Aetna Health Plan Inc. and Texas Health + Aetna Health Insurance Company (Texas Health Aetna)

Aetna is the brand name used for products and services provided by one or more of the Aetna group of subsidiary companies, including Aetna Life Insurance Company and its affiliates (Aetna). Aetna provides certain management services on behalf of its affiliates.

About this form

You cannot use this form to initiate a precertification request. To initiate a request, call our Precertification Department or you can submit your request electronically.

This form will help you supply the right information with your precertification request. Failure to complete this form and submit all medical records we are requesting may result in the delay of review or denial of coverage.

How to fill out this form

As the patient's attending physician, you must complete all sections of the form. You can use this form with all Aetna health plans, including Aetna's Medicare Advantage plans. You can also use this form with health plans for which Aetna provides certain management services.

When you're done

Once you've filled out the form, submit it and all requested medical documentation to our Precertification Department by:

- We prefer you submit precertification requests electronically. Use our provider portal on Availity® to also upload clinical
 documentation, check statuses, and make changes to existing requests. Register today at <u>availity.com/aetnaproviders</u>
 or learn more about Availity at <u>www.availity.com/aetnatraining</u>.
- Send your information by confidential fax to: **Precertification** Commercial and Medicare using FaxHub: **1-833-596-0339**
 - The fax number above (FaxHub) is for clinical information only. Please send specific information that supports your medical necessity review. Please continue to send all other information (claims etc) to appropriate fax numbers.
- Mail your information to: PO Box 14079
 Lexington, KY 40512-4079

What happens next?

Once we receive the requested documentation, we'll perform a clinical review. Then we'll make a coverage determination and let you know our decision. Your administrative reference number will be on the electronic precertification response.

How we make coverage determinations

If you request precertification for a Medicare Advantage member, we use CMS benefit policies, including national coverage determinations (NCD) and local coverage determinations (LCD) when available, to make our coverage determinations. If there isn't an available NCD or LCD to review, then we'll use the Clinical Policy Bulletin referenced below to make the determination.

For all other members, we encourage you to review **Clinical Policy Bulletin #837: Shoulder Arthroplasty and Arthrodesis**, before you complete this form.

You can find the Clinical Policy Bulletins and Precertification Lists by visiting the website on the back of the member's ID card.

Questions?

If you have questions about how to fill out the form or our precertification process, call us at:

Which shoulder will surgery be performed on?		
Left Right		
Please submit a separate form for each shoulder.		
	oulder Arthroplasty	
Reason for surgery (Diagnosis):		
(Select all that apply)		
Osteoarthritis Dhaumataid arthritis		
Rheumatoid arthritis		
Avascular necrosis Dest traumatic arthritis		
Post-traumatic arthritis Malunian fracture of the previous laureague		
☐ Malunion fracture of the proximal humerus ☐ Fracture of proximal humerus		
· · · · · · · · · · · · · · · · · · ·	nt or adjacent soft tis	sues by imaging
Malignancy of the scapula, proximal humerus, shoulder joint or adjacent soft tissues by imaging Nonunion/failure of a previous proximal humeral fracture surgery (shown by imaging)		
Does the member have any of the following contraindications?		
(Select all that apply)		
Active infection of the joint, or active systemic bacteremia, that has not been totally eradicated		
Active skin infection (other than recurrent cutaneous staph infections) or open wound within the planned surgical site of the shoulder		
Allergy to components of the implant (such as cobalt, chromium, alumina)		
Rapidly progressive neurologic disease		
Osseous abnormalities that cannot be optimally managed and which would increase the likelihood of a poor surgical outcome (i.e., inadequate bone stock to support the implant)		
☐ None of the above		

Continued

Section 2: Total Shoulder	Arthroplasty (continued)
Shoulder replacement system Will a custom total shoulder implant be utilized? Yes No Computer (robotic) assisted musculoskeletal surgical navigation Will computer (robotic) assisted musculoskeletal surgical navigation be utilized? Yes No	
Will computer (robotic) assisted musculoskeletal surgical navigation be utilized? Yes No Radiographic evidence of the following (Select all that apply)? Irregular joint surfaces Glenoid sclerosis Malunion of fracture (proximal humerus) Avascular necrosis of the humeral head with collapse Osteophyte changes Flattened glenoid Cystic changes in the humeral head Joint space narrowing of the shoulder join Fracture of proximal humerus Nonunion/failure of a previous proximal humeral fracture surgery	
 Malignancy of the scapula, proximal humerus, shoulder joint or adjacent soft tissues On exam, what is the ROM (range of motion) flexion/abduction/rotation? □ Normal or Mild Limitation □ Significant Limitation 	
How much does this limit the member's daily activities? Mildly Moderately Severely	
What degree of pain is the member having? Mild Moderate Severe	
Has the member experienced this degree of pain for 6 mont	ths or longer? Yes No
Does the member have Glenoid bony erosion with posterior of Yes ☐ No	or anterior subluxation (Walch Classification B2 glenoid)?
Has the member attempted and failed at least 12 weeks non	n-surgical treatment in the past 12 months?
Which of these treatments have been attempted in the past (Select all that apply) NSAIDS Formal Physical Therapy: Duration (weeks): Date Activity Modification Joint injection For rheumatoid arthritis only: Anti-cytokine agents (e.g., e azathioprine, cyclosporine, gold salts, hydroxychloroquine, le	es to and from: etanercept, infliximab) and non-biologic DMARDs (e.g.,

Section 3: Reverse Total Shoulder Arthroplasty	
Reason for Surgery (Diagnosis):	
(Select all that apply)	
Massive rotator cuff tears with pseudo-paralysis and without osteoarthritis	
Deficient rotator cuff with glenohumeral arthropathy	
Failed hemiarthroplasty	
Failed total shoulder arthroplasty with failed rotator cuff that	is non-repairable
Shoulder fractures that are not repairable or cannot be reco	nstructed with other techniques
Reconstruction after a tumor resection	
Does the member have any of the following contraindication	ns?
(Select all that apply)	
Active infection of the joint, or active systemic bacteremia, t	hat has not been totally eradicated
Active skin infection (other than recurrent cutaneous staph infections) or open wound within the planned surgical site of the shoulder	
Allergy to components of the implant (such as cobalt, chromium, alumina)	
Rapidly progressive neurologic disease	
Osseous abnormalities that cannot be optimally managed and which would increase the likelihood of a poor surgical	
outcome (i.e., inadequate bone stock to support the implant	·)
None of the above	
Shoulder replacement system	
Will a custom total shoulder implant be utilized? Yes N	0
Computer (robotic) assisted musculoskeletal surgical navi	<u> </u>
Will computer (robotic) assisted musculoskeletal surgical navigation be utilized? Yes No	
Radiographic evidence of the following (Select all that apply)?	
MRI Massive Rotator Cuff Tear	
MRI Rotator Cuff Tear	
Irregular joint surfaces	
Glenoid sclerosis	
Osteophyte changes	
Flattened glenoid	
Cystic changes in the humeral head	
Joint space narrowing of shoulder joint	
Failed total shoulder arthroplasty with failed rotator cuff that is non-repairable	
Shoulder fracture that is not repairable or cannot be reconstructed with other techniques	
Need for reconstruction after a tumor resection	
Failed hemiarthroplasty
