Members generally pay a lot more money out of pocket when they have testing done at out-of-network labs. To help save money, it's best to use in-network labs. Below are some of the preferred labs.

**Preferred labs**

**Quest Diagnostics is our national preferred lab.** Aetna members save when they use them. Quest Diagnostics and their affiliates offer a wide range of testing services — from routine blood tests to complex gene-based, cardiology and molecular testing, including prescription drug monitoring. For remote areas, Quest has teamed up with a company called Igbo to offer mobile lab testing. The lab testing can be done in a physician's office, or your home or workplace. For more information, visit questdiagnostics.com/mobilelab or call Igbo at 1-866-268-7617 to see if you are eligible. The following Quest Diagnostics affiliates are also preferred labs in our network:

- **AmeriPath**
- **Associated Clinical Laboratories**

Out-of-network labs

Out-of-network labs can cause members to pay more out of pocket. Members should always be referred in network. It’s also not consistent with our policy to use of out-of-network laboratory services.

The following table shows how much more members can pay when they use out-of-network labs:

<table>
<thead>
<tr>
<th></th>
<th>In-network lab</th>
<th>In-network hospital lab</th>
<th>Out-of-network lab</th>
</tr>
